New Connects

Our New Connect File includes New Consumer Telephone Connects. New Connects are great prospects for home improvement, local retail stores, insurance, subscriptions, and more.

The New Connect File is compiled using telco and telco-verified data sources.

- * High Performing database
- * 180 Million Residential, Business, and Government Listings
- * Name, Address, and Telephone Number
- * Weekly Updates
- * Telco Quality Data -- sourced directly from the service order at the telephone companies
- * Includes typical white page listings (names, address, and phone number) plus can have business category appended to business listings (e.g. insurance agents, auto dealers, etc)
- * 2-2.5 million updates a day
- * Updates create our new connect and disconnect service
- * There is no more current or accurate source for name, address, and telephone numbers.
- * Because this data is used to drive the 411 services of many major phone companies, we are held to a high quality standard. Independent audits of the data conducted on a quarterly basis. Recent audits put the data accuracy at about 98%.
- * Our Listings come from the phone company directory assistance records, not the white pages of the phone books.

Pricing is based on quantity and selects. Please contact a representative for further details.
